

GLASS WHOLESale

SanctaGlass™ Tint

THE CHOICE IS CLEAR

SanctaGlass™ Tint

As climates vary around the country and throughout the year, we have a range of different tinted glass products to provide the level of solar heat protection you need.

SanctaGlass™ Tint offers a range of blue, green and grey tones to match your local climate, with darker tones providing higher levels of protection against solar heat gain. This protection passively manages comfortable internal temperatures in your building, saving on the need for costly active cooling systems such as air conditioning.

With levels of solar protection perfect for your location as well as the design sensibilities of glass, **SanctaGlass™ Tint** offers ways to make your building more comfortable for working and living while opening your space to more design options.

SanctaGlass™ Tint is high performance tinted glass with a low-E coating, offering solar heat protection to suit your building's local climate and design aesthetic.

Range of Tones

Different glass tones that provide different levels of solar heat protection. Choose from a range of options to suit your design aesthetic.

High Levels of Light Transmission

SanctaGlass™ Tint allows you to keep your building comfortable and energy-efficient without sacrificing natural light and views.

Glare Reduction

Reduce the amount of glare both inside and outside the building, allowing you to better enjoy the natural light in your space.
